SKILLS

Languages	JavaScript, TypeScript, HTML5, CSS3, SCSS
Frameworks & Libraries	React.js, Redux, Vue, Vite, Svelte, SvelteKit, Tailwind CSS, Bootstrap, RESTful API
Tools & Platforms	Git, NPM, Node, Jest, React Testing Library, Webpack, Postman

EXPERIENCE

Software Engineer, Frontend Developer Prashant Advait Foundation	Jan 2024 – May 2024 <i>Noida, Delhi</i>
--	--

- Built interactive multimedia post and quiz features in the Gita Feed web app using React, Redux, and Tailwind CSS, enabling users to upload reflections (images, video, audio, text), boosting user engagement by 100%.
- Developed international and national donation features with forms, dynamic amount slider, and CAPTCHA using React, Redux, and Tailwind CSS, achieving a \$1M quarterly donation target.
- Reduced avg load time of website by 5+ seconds by modularizing components and reducing re-renders using `useMemo`, `useCallback`, and React Profiler — improving UX for 150K+ users and 2K daily e-book downloads.

Software Engineer, UI Developer Quinbay Technologies A B2C product company building scalable solutions for the Indonesian e-commerce market	July 2022 – July 2023 <i>Bengaluru, Karnataka</i>
--	--

- Built the Product Listing page using Vue.js, Tailwind CSS, TypeScript and Vite for the Instant Grocery section of the Bilibli e-commerce platform from scratch. Integrated multiple REST APIs for real-time updates—contributing to a 66% YoY growth in Bilibli's First-Party Retail segment (\$51.89M).
- Developed and integrated real-time 3PL order tracker on the Product Detail page (order placed, shipped, delivered, cancelled) using Vue.js enhancing transparency and boosting customer satisfaction by 60%.
- Built the Multi Pickup Point feature in Vue.js to optimize order fulfillment across warehouses, reducing delivery time by 50%, cutting logistics costs by 30%, and improving overall operational efficiency.

Software Engineer Intern, UI Developer Quinbay Technologies	Jan 2022 – Jun 2022 <i>Bengaluru, Karnataka</i>
---	--

- Built Order Center feature using Svelte, SvelteKit to automate bulk order status updates via CSV upload (5,000+ IDs) and API sync using Vue.js, reducing manual work by 99% and sprint cycle time by 20%.
- Migrated monolithic Angular Seller Center to Vue.js and Tailwind CSS. Built Product Detail and feedback modules, increasing website traffic by 40% and optimizing merchant operations.

PROJECTS

Built a ride-hailing web app with React and Leaflet.js featuring real-time routing, dynamic vehicle markers, location integration, responsive UI, and efficient state management for smooth navigation. ([Try it here](#))

Developed a Chrome extension, **Screenshot Pro** with 1,500+ active users and 4.9 rating, enabling full-page screenshot capture and seamless browser integration. ([Try it here](#))

Other Major Projects: Explore more on [my portfolio](#).

EDUCATION

B.Tech in Information Technology – 8.20 CGPA Banasthali Vidyapith, Rajasthan	2018 – 2022
